

FINAL CALL FOR PAPERS

Workshop on

Intelligent Analysis of Images and Videos (IAI&V 2009)

organized as a part of

**13th International Conference on Knowledge-Based and
Intelligent Information & Engineering Systems KES2009**

28, 29 and 30 September 2009 Santiago, Chile

<http://kes2009.kesinternational.org/>

IAI&V 2009 will bring researchers, developers, practitioners, and users to present their latest research, results, and ideas in all areas of intelligent image processing methods. We hope that theory and successful applications presented at the IAI&V 2009 will be of interest to researchers and practitioners who want to know about both theoretical advances and latest applied developments in intelligent vision systems. As such, IAI&V 2009 will provide a forum for the exchange of ideas between theoreticians and practitioners to address the important issues. Papers related to theories, methodologies, and applications in science and technology in this theme are especially solicited.

Topics covering industrial issues/applications and academic research are included, but not limited to:

- * Intelligent methods dedicated to images analysis
- * Image Interpretation and analysis
- * Images retrieval on the basis of visual content
- * Visual information retrieval
- * Interpretation of semantic information
- * Images auto-annotation methods
- * **Medical images analysis**
- * Knowledge acquisition from images
- * Attention-driven image interpretation
- * 3D video and image content analysis
- * Modeling shape and motion from ordinary images and video sequences
- * Technologies of Vision
- * Models for Computer Vision
- * Biometric systems
- * Evaluation of computer vision algorithms
